CONTACTLESS VISITOR REGISTRATION

Annual Subscription

$99

+ GST

Same Day Set Up

A simple, contactless, QR code based visitor registration solution to assist venues with meeting government requirements to record visitor information and reopen.

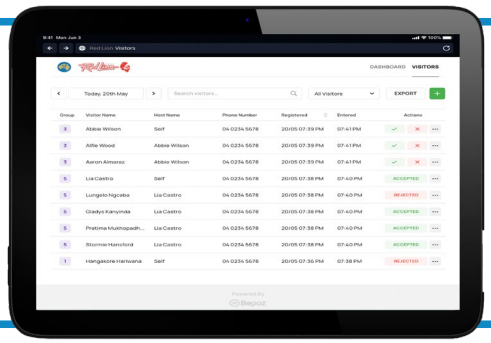
How It Works

1 Scan QR Code

Visitors entering a venue can use their own device to scan a QR code that directs them to a venue managed browser.

2 Register Details

Visitors enter their contact details and submit. Returning visitors will be identified by just scanning the QR code without having to re-enter their contact details.



3 Secure Database

The venue then has a secure database of registered patrons. Should the need arise, the venue can run reports based on time and date periods and export as a CSV.
