With CBS continuing to focus on the gaming reform package, we are getting closer and closer to seeing innovations such as note acceptors, TITO (ticket in / ticket out) and other changes introduced into SA Pubs. With many progressive venues considering TITO (and why wouldn’t you offer the full package to maximise your return) a critical element of this is to install a Cash Redemption Terminal or CRT. CRT’s act as note breakers and also allow your players to cash out their winning tickets discretely and securely. With AGE (Australian Gaming Expo) cancelled for 2020 and other trade events under doubt this presents a great opportunity for AHA members and key gaming staff to see our CRT in action...plus we are offering some very keen early bird specials for those keen on making a commitment and locking in a deal. Please contact Michael Queale on 0408 462 321 to arrange your own private demo session and we look forward to showing you the benefits of Banktech’s QuickPay CRT.

The Australian Hotels Association (South Australia) is pleased to announce a new partnership with energy experts Make it Cheaper, to help our members reduce and manage their energy costs. Under this agreement our members will receive an obligation-free review of their energy bills and contract together with details of alternative money-saving energy offers, where available. Many businesses in the Hotel and Hospitality industry typically have a high energy consumption profile and it isn’t just high electricity bills, many have very high gas usage too. It can often be the case when hotels and hospitality venues are starting out, they are hesitant to commit to long term commercial contracts. For this very reason it is essential to engage with an energy procurement specialist like Make it Cheaper to ensure you contract your business correctly.

Make it Cheaper’s energy experts continually monitor the market to find great offers, and they take care of the paperwork and retailer notifications to make switching simple. Hotels that move from current contracts into the cheaper price cycle can make substantial savings, and a number of plans now offset carbon emissions from energy usage for no extra cost. For a free review of your hotel’s energy bill click the following link - https://www.makeitcheaper.com.au/landing/ahasa
